Experience

JULY 2021 - PRESENT

Capgemini, Mumbai– *Senior Software Developer*

- Experience in full life cycle software development process (SDLC) including system analysis, technical design documentation, coding, and testing.
- Worked on platforms like MuleSoft, GCP, Apigee, and EDI.
- Implemented API-Led connectivity and was involved in code walkthroughs, Mule debugging, and error fixing.
- Implemented integration with different types of source and target systems such as Salesforce and DB.
- Experience in developing RESTful APIs.
- Strong application integration experience using Mule ESB with connectors, transformations, and Routing.
- Conducted pre-session questioning, and wrote technical blogs on the company's behalf.

DEC 2019 - JAN 2020

CMS Infosystems, Mumbai– *Software Engineer Intern*

- Developed a cross-platform application integrated with a beacon to track deliveries, while collaborating with a team of experienced programmers.
- Acquired knowledge and guidance from a mentor, Mr. Subash Kelkar(CTO), on software development techniques, cross-platform application development, and beacon integration.

DEC 2018 - JAN 2019

TalentHome Solutions LLP, Mumbai– *Web Development Intern*

- Designed and developed a user-friendly football-based website to connect local turf venues with a proper user interface, utilizing various plugins provided by CSS, WordPress, and HTML.
- Utilized a paid hosted domain to develop and deploy the website, enabling easy access and navigation for users.
- Achieved successful completion of the project, resulting in an interconnected platform for local turf venues and an enhanced user experience.
